

Soils and Crops 2010

February 24-25, 2010
Veterinary Medicine Building
University of Saskatchewan

Day 1

Soil and Water Management Workshop
February 24, 2010 8:00 am - 5:00 pm

This workshop will provide in-depth training on a variety of topics emphasizing soil and water management.

Topics will include:

- Irrigation
- Soil Genesis
- Manure Management
- Watershed Planning in Saskatchewan
- Soil Quality
- Greenhouse Gas Management
- Management of Problem Soils
- Groundwater Quality and Agriculture

Poster Session, Wine and Cheese Banquet
5:00 - 7:00 pm

(sponsored by: Morris Industries)

This session will feature a variety of posters which provide updates on current research being conducted in the areas of soils, crops and economics by researchers, faculty and graduate students from across Western Canada. Submitted posters and the authors will be present to showcase their research results.

This is a CCA Accredited Workshop

Day 2

Soils and Crops Oral Presentations
February 25, 2010 8:00 am - 5:00 pm

Day 2 features a variety of concurrent oral presentations given by researchers, faculty and graduate students from across Western Canada. Topics are presented which provide updates on current research being conducted in the areas of soils, crops and economics.

There will be awards distributed for best overall graduate student poster and presentation.

Participants may choose to register for one or both days of Soils and Crops 2010.

For more information or to submit a conference paper, please see the Soils & Crops website
