

# KANAWAYIHETAYTAN ASKIY

“LET US TAKE CARE OF THE LAND”

Kanawayihetaytan Askiy is a uniquely designed program developed in collaboration with First Nations. It is focused on providing a broad range of topic areas specific to the management of lands and resources on federal reserve lands.

The program provides students a foundation of scientific and traditional knowledge. Students are prepared for careers in governance, management, administration and leadership roles.

To accommodate professional work lives, the Kanawayihetaytan Askiy program provides a blended learning method of classroom, online and field studies.

# PROGRAM OPTIONS

## **Kanawayihetaytan Askiy Certificate**

This certificate examines basic environmental, legal and economic aspects of land and resource management in Indigenous communities. Students travel to Saskatoon three times a year for two weeks and work from their home for the duration of their studies.

Completion of this certificate meets requirements for Level Two: Technical Training of the National Aboriginal Land Managers Association's (NALMA) Professional Lands Management Certification program. Visit [www.nalma.ca](http://www.nalma.ca) for more info.

## **Diploma in Indigenous Lands Governance**

This diploma provides students with a broad background in governance, management, administration and political science as they relate to Indigenous communities.

## **Diploma in Indigenous Resource Management**

This diploma provides students with a broad background in resource management for Indigenous communities.

*The diploma programs have two entry options. Students can now enter the diploma programs directly from high school or they can complete the Kanawayihetaytan Askiy certificate first before laddering in.*
